

Before and After Physical Activity

Warming Up, Cooling Down and Stretching

WARM UP

- Before we do exercise, like doing PE or sports training, it is necessary to prepare our bodies by warming up.
- When we are active, the heart and lungs work harder and faster to circulate blood around the body.
- Warming up involves doing light activity to gradually increase our heart rate so that the body is prepared for more intense physical activity.

Warm Up Stretch: After warming up our bodies and muscles with light activity, we then do a Warm Up stretch. We do not stretch without first warming up because our muscles are a little bit like plasticine. When we take plasticine out of the packet or tub, it is cold and hard. We need to warm it up by moving it around to make it soft and stretchy. Our muscles are similar; they need to be moved around and warmed up to become flexible enough to stretch.

- ➔ Full body stretches are suggested in each Action For Life lesson plan before the first main activity (Warm Up Stretches) and at the end of each lesson (Cool Down Stretches). Particular attention should be given to stretching the body parts used within the lesson.
- ➔ The stretch should be held when a gentle tension is felt in the muscle.
- ➔ If doing a specific stretch causes pain, stop the stretch. **Stretching should not cause pain.**

COOL DOWN

- When we finish exercising, we are still breathing fast and our hearts are still working hard to deliver blood all around the body.
- If we stop suddenly, the body thinks it is still exercising and continues to react as if it is.
- Cooling down means doing a lighter activity to ease the body out of its work mode and allow the breathing and heart rate to return to normal.
- Stopping suddenly without doing a Cool Down could make us feel dizzy or unwell and can make the muscles sore.

Cool Down Stretch: Cool Down stretches should be done after the cool down to keep the muscles strong, flexible and healthy. Cool Down stretches are usually held for longer than Warm Up stretches and done in a seated or lying down position for a deeper stretch. Stretching can help to prevent muscle soreness after physical activity.

Stretches are detailed on the pages overleaf.

Warm Up Stretches

○ = Area where stretch should be felt

- ➔ Hold the position when a gentle tension is felt; you should not feel pain or discomfort.
- ➔ Keep breathing normally through the stretches.
- ➔ Hold each stretch for 8-10 seconds.

1 Quad Stretch

- Stand with feet hip distance apart.
- Bend left knee and catch foot.
- Gently pull heel to bum.
- Hold onto wall for support if necessary.
- Keep hips level and both knees close together.

2 Hamstring Stretch

- Step right foot backwards.
- Bend right knee, leaning upper body forward from hips with back straight.
- Place hands on thigh for support (not on knee).
- Gently push hips backwards as if sitting into a chair.
- Stretch should be felt on back of upper part of the straight leg.

3 Calf Stretch

- Step left leg back, keeping right knee bent from Hamstring Stretch.
- With straight back leg and feet flat on the ground, push weight through back heel into ground.
- Stretch should be felt in bottom of back of straight leg.
- Push against a wall or move feet further apart for deeper stretch.

Complete stretches 1, 2 and 3 on left leg, then change to right leg.

4 Chest and Shoulder Stretch

- Stand with feet hip distance apart.
- Lace fingers together behind the back with palms facing the body.
- Gently squeeze shoulder blades together and lift arms only as far as comfortable.

5 Tricep Stretch

- Stand with feet hip distance apart.
- Raise both arms overhead.
- Bend one elbow and allow hand to drop between shoulder blades.
- Reach fingertips down spine and support elbow with other hand.
- Repeat with opposite arm.

6 Upper Back Stretch

- Interlock fingers with palms facing body.
- Bring arms to shoulder height and drop chin to chest.
- Gently reach arms forwards, feeling the stretch between the back of your shoulders.

7 High Reach Stretch

- Stand with feet hip distance apart.
- Hold hands above head and stretch upwards.
- Feel the stretch along the whole upper body.

Cool Down Stretches

○ = Area where stretch should be felt

- ➔ Hold the position when a gentle tension is felt; you should not feel pain or discomfort.
- ➔ Take slow deep breaths during the stretches.
- ➔ Hold each stretch for 10-15 seconds, unless otherwise specified.

1 Lower Back Stretch

- Lie on back with knees bent and feet flat on floor.
- Place hands at back of thighs and pull knees gently towards chest.
- Keep upper back, shoulders and head on floor throughout the stretch.

2 Lying Hamstring Stretch

- Lie on back with knees bent and feet flat on floor.
- Lift one leg and hold hands around back of thigh.
- Gently pull leg, only as far as comfortable, keeping the leg straight.
- Stretch should be felt through the back of the lower leg.

Repeat with opposite leg

3 Lying Quad Stretch

- Turn onto front of body to lie on stomach.
- Rest head on forearm.
- Bend one leg and hold foot with hand on same side.
- Keeping both hips on the floor, gently pull the heel towards the bum.

Repeat with opposite leg

4 Cat Stretch

- Kneel with both hands on floor (knees below hips and hands below shoulders).
- Let out a deep breath, tuck chin towards chest and round the back – imagine that you are trying to move your belly button up to the sky.
- Do not hold this position as you will move slowly into Cow Stretch on next breath in.

Move slowly from Cat Stretch to Cow Stretch and back for a few breaths – slowly moving into Cat Stretch on breath out and Cow Stretch on breath in. Repeat sequence 3-4 times.

5 Cow Stretch

- Kneel with both hands on the floor as in Cat Stretch.
- Taking a deep breath in, arch the back, tilt the chin and look up.
- Gently press the stomach down and the hips up.

6 Seated Calf Stretch

- Sit on floor with legs wide.
- Bend one knee, bringing the sole of the foot to rest on the inner thigh of the opposite leg.
- Point toes of straight leg towards the face and reach gently towards toes, keeping back straight.
- Stretch should be felt in the back of the bottom of the straight leg. *Repeat with opposite leg*

7 Inner Thigh Stretch

- Sitting on floor with straight back, bend both knees, placing soles of feet together.
- Hold legs at ankles, sit up tall and allow knees to fall towards the floor (don't push the legs).
- For a deeper stretch, hold feet and lean slightly forward.

8 Seated Chest Stretch

- In a seated position on the floor, place both hands behind the back.
- Rest the palms of the hands on either side of the spine at the lower back with fingertips facing downwards.
- With straight back and head facing forward, gently press elbows together to stretch across the chest.
